

BOARD ONE

Anytime Touchdown

1 Set the "Odds up to" box. 999 first, then 500.

The board opens at 2,500, which drags in every +2000 lottery ticket on the slate. Type **999** and you're left with the players anyone would actually bet.

Type 999 here

Then type **500** in the same box. That's your real shortlist — anything priced longer than +500 is a dart throw.

2 Read one column: **Model Edge**.

Model Edge is our chance of a touchdown **minus** the chance the sportsbook's price implies. Derrick Henry: we say 66.7%, Hard Rock is charging you like it's 35.7%. That gap — **+86.8%** — is the edge.

Everything lives or dies in this column

THE ONE RULE

Anything over +20% Model Edge is a very strong bet.

Weight those heavier than everything else on your card.

Your +20% cut lands right here — Mike Evans is the last one you press

Jonathan Taylor RB · IND	at KC Sun 8:20	0.86	-105	+110	• Hard Rock	57.7%	47.6%	+21.1%

Above this band, every play clears a +12.5% edge. Below it, don't bet.

Further down there's a second band, the **Break-Even Line** — below that one the sportsbook has the edge on you, not the other way round.
